Simple Apps

webdev: reddit for web developers

Let's say you need to build a very simple app with a few screens, light on js and CSS and other assets. Do you choose - an on line service all your files from the server and storing assets on a web server. - or - a simple vite react app and a simple server sending json to and from the client and server...

Deploying my first-ever project, a daily textual update: am I going about it the right way?

webdev: reddit for web developers

TLDR - I plan to use a daily Python script to generate HTML pages, stored and served via PythonAnywhere high-level corporate website that will have a daily textual sports update. Approach: I've come up with a working Python script that generates as output the textual update. It relies on a few basic...

I know it's a rookie question, but with a software and web development company, how are the specific needs and capabilities 'discussed' beforehand with the client who orders the software?

webdev: reddit for web developers

Is there a big meeting where the dev teams (or the leaders of the developers) all show, listen to the client who wants to commission the making of a software or website, etc. from the development company, and they go through the details and options for hosting, backend, technologies the company is capable...

Help me convince my boss that we're not charging enough

webdev: reddit for web developers

Hello! I currently work as a Lead **developer** in a digital marketing agency. We're basically a startup but have been going for around 8 years or so and have fairly big clients (some of our websites are actively used by celebrities and fashion). As the lead **developer** I constantly have my Boss on my back...

Is there a place to search for words within domain name strings?

webdev: reddit for web developers

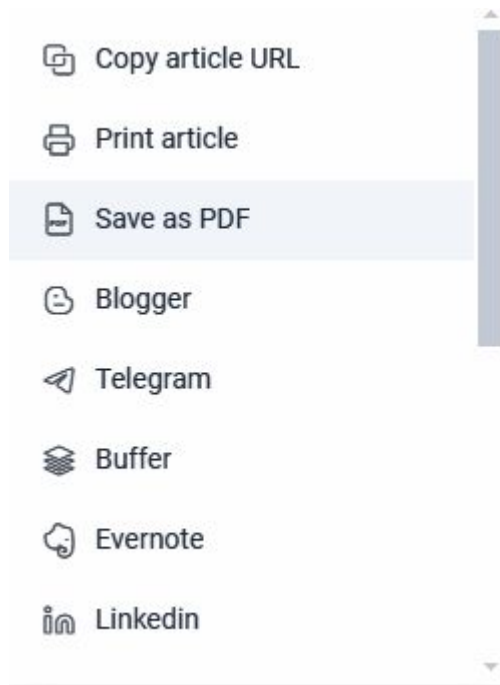

Basically, I want to check if anyone owns domain names linked to my company. So if, for instance, my company is called 'Grimdang', is there any way to search for domain names, even just in com, that contains the word 'Grimdang' in it (for example, EatGrimdang.com, Grimdangsocks.com). Does this...

Pouvoir voir des actualités en temps réel de différentes sources via les flux RSS

L'extension Inoreader permet d'indiquer si un site web est compatible avec les flux RSS ou non. Elle permet également de faire apparaître des notifications à chaque nouvelle publication.

Logo RSS:

Possibilité d'exporter le feed en un site web

The screenshot shows the 'Content' settings modal for a feed named 'Web Development'. The modal is divided into several sections:

- Link:** <https://www.inoreader.com/stream/user/1005302731/tag/Web%20Development/view/html?cs=m>. An 'Enabled' toggle switch is turned on.
- Use this code in your website or blog:** A code block containing an iframe: `<iframe width="670" height="800" src="https://www.inoreader.com/stream/user/1005302731/tag/Web%20Development/view/html?cs=m" frameborder="0" tabindex="-1"></iframe>`
- Customize:**
 - Page title:** A text input field with the placeholder 'Leave blank to use the default title'.
 - Logo URL:** A text input field with the placeholder 'Leave blank to use the default logo'.
 - Logo width:** A dropdown menu set to 'Auto'.
 - Logo height:** A dropdown menu set to 'Auto'.
 - Choose layout:** A dropdown menu set to 'Magazine view'.
 - Items per page:** A text input field set to '20'.
 - Text align:** A dropdown menu set to 'Left'.
 - Link color:** A color picker set to '#296BCC'.
 - Text color:** A color picker set to '#1a2433'.
 - Divider color:** A color picker set to '#D9DDE6'.
 - Background:** A color picker set to '#EFEFEF'.
 - Share buttons:** A dropdown menu set to 'No'.
- Reset customizations** link.
- Close** button.

O11y Guide, Cloud-Native Observability Pitfalls: Ignoring Existing Landscape

Are you looking at your organization's efforts to enter or expand into the cloud-native landscape and feeling a bit daunted by the vast expanse of information surrounding cloud-native observability? When you're moving so fast with agile practices across your DevOps, SREs, and platform engineering...

Comment ai-je sélectionné mes sources d'information?

- évaluer le travail à faire et ses contraintes
- se renseigner sur des technologies (langages, librairies, frameworks) permettant de simplifier la réalisation du projet

Utiliser des sources pertinentes

- En ayant auparavant analysé les contraintes du projet et en y cherchant des solutions avec des hashtags génériques sur reddit tels que web_design ou front-end Development ou avec des tags plus spécifiques tels que database par exemple
- En cherchant des articles plus spécifiques comme par exemple sur React ou PHPMailer

En quoi la veille a été utile?

- A permis de définir les plugins et technologies à utiliser
- Permet de justifier pourquoi avoir choisi telle technologie ou non
